Position Description

Job Title: Reports Developer
Location: Mumbai
Reports to: Team Lead - IT

Updated By: Shrenik Shah
Updated Date: November 26th, 2020

Summary:

Caliber.global provides supply chain management services to customers in the retail, hospitality, cosmetic and telecommunication industry amongst others. Working with project management teams called "Control Towers", Caliber.global has offices in America, Canada, Hong Kong, Shanghai, India and The Netherlands.

Through a proprietary state of the art system, Control Towers connect project managers and suppliers to an agile network of warehouses around the globe. Caliber.global coordinates project logistic activities on behalf of these customers to increase speed to market, lower overall non-merchandise supply chain costs and provide end-to-end visibility over project activity.

We are the only global project logistics supply-chain partner for International brands, and we have strong experience in managing the complexity of non-merchandise logistics e.g. furniture, fixture and equipment (FF&E). Additionally, we are experienced in managing supplier capabilities and opening large volumes of multiple projects simultaneously, domestically and internationally.

All our team members have or will develop extensive knowledge in forecasting, managing FF&E orders, product movement, and delivery of FF&E materials to International markets. We have a strong system and well-defined processes that serve as the basis for our extensive training, especially for entry-level team members.

The Data Analyst is responsible for technical aspects of MyCaliber Reporting platform. He/she is responsible for developing and implementing reports and other aspects related to reporting of MyCaliber platform.
